AWARDS

dev.to Published Author – Published technical articles on dev.to covering front-end fundamentals, UX, and computer science topics such as the K-D Tree algorithm, contributing to the developer community through educational content. You can check my articles [here](#).

OPEN SOURCE CONTRIBUTIONS

2026 – Currently – AbacatePay (Payment Platform)

Open Source Contributor

- Identified and fixed an expired link in the project's official GitHub documentation, improving accuracy and usability for other developers consulting the repository.

FREELANCE EXPERIENCE

2026 – Freelance Web Developer

One-page Website Project – Local Entrepreneur

Key Responsibilities & Achievements:

- Designed and developed a one-page website using HTML, CSS, and JavaScript, translating the client's business needs into a functional web presence.
- Produced and organized instructional video content for a self-makeup and biosafety course, structuring material into clear, sequential modules for an online course platform.
- Managed the project independently from planning to delivery, handling both technical execution and client communication.
